## **CSWC Operational Period Summary**

### **1800 December 17 2016 to 0600 December 18 2016**

The Nimbus Dam is a base load hydroelectric dam on the American River near Folsom, California. Approximately 8,700 acre feet of water is retained by the dam. It is responsible for the impoundment of water from the American River to create the Lake Natoma Reservoir.

- None reported

# WEATHER OF CONCERN

## Weather of Concern

- Colder temperatures are expected this morning with temperatures dipping into the middle to upper 20s for several hours in portions of Northern and Southern California. The cold temperatures are expected to be a little more widespread on Monday morning.

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/www\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php)

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

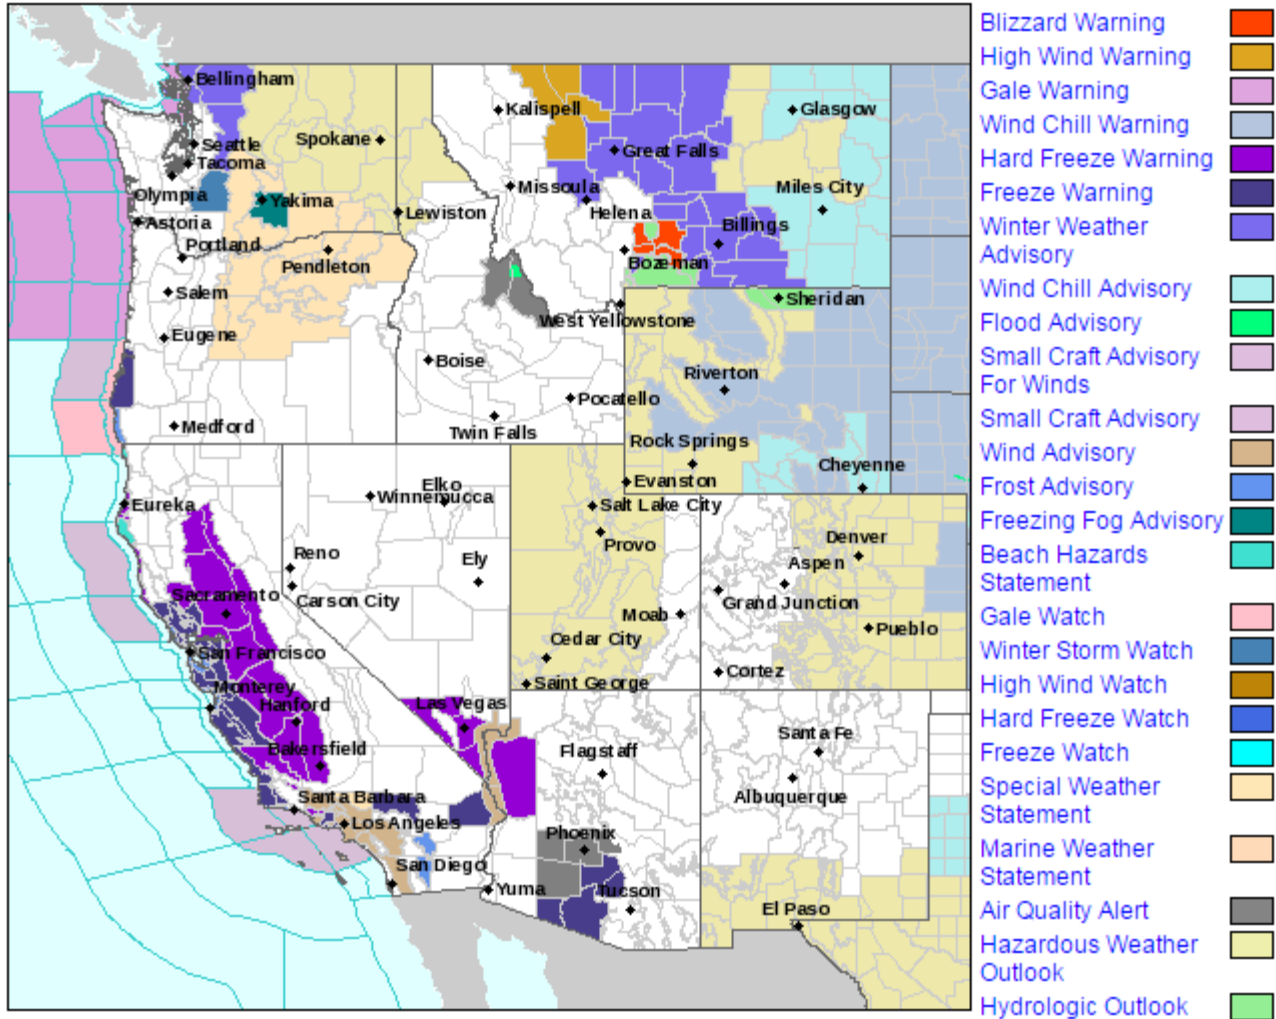

Freezing temperatures in the Valley this weekend with dry conditions. Mainly dry next week except for a chance of light showers during mid week. Dry northerly flow continues across northern California this morning, with high pressure aloft over the eastern Pacific. Light winds and clear skies can be found across much of the region, allowing for optimal radiational cooling. Temperatures as of this writing are at or below freezing across much of the Valley. A northerly breeze has kept temperatures more moderated along the far northern Valley.

## **SOUTHERN CALIFORNIA**

Very cold conditions have moved into a good portion of the forecast area this morning. The combination of an already cooler air mass moving into the region, light winds in wind protected areas and dry air has allowed temperatures to plummet this morning. That being said, this will be a tricky forecast this morning. Looking at the 24-hour trends with temps, most wind protected areas are much colder than yesterday at this time. However, where offshore winds are already developing, the air is able to by mixed and some mountain and wind prone valley locations are actually a few degrees warmer than yesterday. Unusually cold night time temperatures will continue through tonight with widespread frost and freeze conditions. A moderate Santa Ana wind event and a weak ridge of high pressure will bring sunny skies and gradual warming through early this upcoming week. A trough of low pressure may bring a return to cooler conditions and increasing cloudiness later in the week. Showers are possible early the following week.
